SUMMARY

Highly motivated, multilingual IT and Customer Support Specialist with dual expertise as a Virtual Assistant and Data Analyst. Proven track record in providing technical support and managing administrative workflows using core VA tools. Skilled in utilizing Excel, SQL, Power BI, Databricks, and Python to analyze support trends, resolve system issues, and deliver data-driven business insights while maintaining fluent written and spoken English.

EXPERIENCE

IT SUPPORT ENGINEER

Aug 2024 - Present

Pergamon Group Limited

- Providing technical assistance and support to users who are experiencing technical, hardware, or software problems
- Assisting in network expansion projects, including Wi-Fi deployment and switch upgrades.
- Managing help desk tickets and ensuring timely resolution of IT support requests.
- Monitoring and maintaining endpoint security systems and network security tools.
- Provided technical support for remote teams, ensuring reliable connectivity and communication tools.
- Maintaining proper documentation of network configurations, changes, and incidents.
- Providing training and guidance to users on how to use hardware and software effectively and securely.
- Maintained accurate IT asset inventory and supported regular audits to ensure accountability.
- Providing remote assistance to users through phone, email, or remote desktop tools to troubleshoot and resolve technical issues.
- Installation, configuration, maintenance, and troubleshooting ICT infrastructure, including hardware, software, and network devices.
- Assisted in streamlining digital operations by integrating and troubleshooting APIs, ensuring seamless communication between core systems and external service providers.
- Collaborated with external service providers and hardware vendors while managing the timely escalation of complex technical issues to Tier 3 engineering teams.
